

Project: Rural Nursing Program

Recipient: Martin Methodist College

Address: 433 West Madison Street, Pulaski, TN 38478

Subcommittee: Labor, HHS, Education

Amount requested: \$2,500,000

Project description: Renovate and expand the Andrews Science Building in order to better accommodate the needs of its growing baccalaureate nursing program and the programs that support the college's pre-health professions program. While the need for Registered Nurses, especially those with baccalaureate degrees is well documented nationally, the need is especially acute in rural areas such as in the Fourth Congressional District. The renovation and expansion of the Science Center will provide needed jobs for area contractors.
